Bellevue’s
Bel-Red Subarea Plan

Puget Sound Regional Council
Growth Management Policy Board

January 14, 2010

Presented by Paul Inghram, Bellevue Comprehensive Planning Manager
The Bel-Red Plan

Transforms an aging light industrial and commercial area into one of the region’s leading models for growth management and transit oriented development.
Regional Context: Vision 2040

Regional goals:
- Focus development in centers
- Use urban area efficiently
- Integrate land use and transportation planning
- Build off of regional transportation investment
City Context

The Bel-Red Subarea Plan

Downtown Bellevue

Bel-Red

Redmond Overlake

Downtown Bellevue

Bel-Red

Redmond Overlake

116th/Bellevue

Factoria/Eastgate

Grosgrain Community

Commercial Area

Major Employment Centers
Aging Light Industrial Corridor

- 900-acre grayfield area
- Extensive impervious surface coverage
- Ecological damage to streams and environmental systems
- Limited transportation infrastructure
- Adjacent to SR-520 and I-405
- Located between Downtown Bellevue and Overlake regional growth centers
Dominated by Light Industrial Zoning

- Legacy of light industrial and commercial uses, avg. ± 0.3 FAR
- Aging and underdeveloped properties
- Large blocks, with sparse transportation system
- Auto dominated
Regional Transit Investment

- ST long range plan (2004) identified high capacity transit connecting Seattle to Bellevue and Redmond
  - Opportunity to influence routing between Downtown Bellevue and Overlake
- ST2 (2008) - $18 billion voter approved investment to expand light rail includes East Link, connecting Seattle to Bellevue and Redmond
Why Plan for Bel-Red?

- Declining employment in Bel-Red; loss/relocation of some major employers
- Strategic location between Downtown Bellevue and Overlake/Microsoft
- Maximize opportunities created by the coming of Light Rail
- Need to use urban land efficiently and meet 2030 targets
- Economic health and diversification

**2030 Market Forecast:**
- 4.5 million sq. ft. commercial (10,000 new jobs)
- 5,000 housing units (9,500 new residents)
The Bel-Red Subarea Plan

Planning Process

Late 2005
Council Initiation

Sept 2007
Bel-Red Steering Committee
- Bel-Red Vision
- Preferred Alternative
- EIS
City’s Boards and Commissions
- Council development of financing plan
- Subarea Plan
- Land Use Code and zoning
- Incentive system
- TDR interlocal
- Finance plan

Early 2009
Council Adoption

Public Involvement

The Bel-Red Subarea Plan

Land Use

Market Feasibility

Environment

Transportation

The Bel-Red Subarea Plan
The New Vision for Bel-Red

“A sustainable urban development pattern that dramatically reshapes the future of the Bel-Red Subarea, while allowing the area to transition gracefully from its past”

- New, thriving, diverse neighborhoods
- Development focused at light rail transit stations
- Multiple transportation choices
- Comprehensive, connected parks and open space opportunities
- Climate action
- Sustainability and ecological design
- Unique cultural environment
- Housing choice and affordability
Transit-Oriented, Nodal Development

- Compact development, mix of uses & walkable
Complete, Walkable Neighborhoods

- New, higher density neighborhoods with a mix of office, residential and retail uses
- Design character that results in distinctive places that evoke a strong sense of the Northwest
- Complete urban street grid
- Affordable housing choices
- New neighborhood parks, trails and amenities
- Potential cultural/arts district, with focus on “making art”
- Graceful transition of existing commercial and service uses
  - Some areas remain suitable for existing lower density commercial uses
New Streets, Parks, and Stream Restoration

- New NE 15th/16th Street multi-modal corridor
- Arterial street connectivity
- Local street grid
- New community and neighborhood parks
- Revitalized stream corridors and trail system
- $582 million in local investment needed for streets, parks and stream restoration
NE 15th/16th Vision

“Green” elements: urban open spaces; significant tree canopy; natural drainage practices; landscaping; and multi-modal transportation choices
130th Avenue Example - Today
130th Avenue Example - Vision

Mix of housing and retail
Wide sidewalks
Outdoor seating
Model of Environmental Sustainability

- “Great Streams” restoration strategy
- Natural drainage practices
- Encourage use of “green infrastructure”
- Restore streams and wider riparian corridors while creating opportunities for place-making, trails, and stormwater management
- Facilitates city goals to reduce GHG
Goff Creek Example – Conditions Today
Goff Creek Example - Vision

Goff Creek
- Stream feature part of urban development
- Salmon spawning
- “Green infrastructure”
- Open space
Regional TDR Program

- Bel-Red identified as a “receiving area” in King County TDR program, one of the largest TDR programs in the country
- City will allow 75 regional TDR credits to be used in Bel-Red
- Developers will receive Tier 1 incentive credits
- TDR credits can be purchased from King County TDR bank and from designated rural areas that are important to Bellevue, such as:
  - Farm lands that support the Bellevue farmers markets
  - Mountains to Sound greenway
- County provided City with $750,000 to help with the purchase of land for future parks and streams restoration
  - Helps offset a portion of the incentive system that would have been used toward parks and open space development
A Vision for 2030
Implementing the Vision

More than zoning...

- New Bel-Red Subarea Plan
- New Land Use Code and zoning
- Design guidelines
- Investment strategy
- Coordination with Sound Transit on light rail alignment, station locations, and station design
- Ongoing communication with property owners and developers
Investment Strategy

- City investments:
  - General CIP funds (increase in property tax rate)
  - Share of growth in tax revenue
  - Storm drainage fees

- Developer contributions:
  - Transportation impact fees
  - Local improvement districts (LID)
  - Dedication of ROW in some circumstances
  - Incentive zoning system

- Other revenue sources:
  - Grants
  - ROW sellback
Incentive System Framework

LAND USE INCENTIVE SYSTEM

Tier 1
- Parks & Open Space,
  Streams, Affordable Housing,
  & Regional TDR

Tier 2
- “Nice to have” amenities

Potential DEVELOPMENT FEES
(Impact Fees, LIDs)

Value

Lift in Land Value
The zoning lift has the potential to support
the public infrastructure and amenities
needed to transform the Bel-Red area.
Incentive System Tiers

- Tier system prioritizes affordable housing, parks, streams and TDR program.

### Within Nodes

- **Max = 4.0 FAR**
  - **Tier 2: Any (0.5 FAR)**
  - **Tier 1: Parks, Streams & TDR (2.5 FAR)**
  - **Base (1.0 FAR)**

### Outside Nodes

- **Max = 2.0 FAR**
  - **Tier 1: Parks, Strm TDR (1.0 FAR)**
  - **1a: Aff. Hsg. (0.5)**
  - **1b: Parks, Str. (0.5)**
  - **Max = 2.0 FAR**
  - **1a: Aff. Hsg. (0.5)**
  - **1b: Parks, Str. (0.5)**

### Commercial Development
- **Within Nodes**
- **Residential Development**
Significance of Bel-Red Plan & Vision

- Creates new commercial and residential neighborhoods, allowing for growth in the right place
- Helps shape light rail to maximize benefits and best leverage regional investment
- New land use and transportation vision supports planned growth in Downtown and Overlake urban centers
- Helps reduce auto dependency and address climate change
- Helps restore streams and associated habitat
- Creates new parks, open spaces and trails for benefit of the area and the wider community
- Contributes to affordable housing
